

Climate Savvy Grazing Decisions

Climate tools and information to help you make more informed decisions.

Learn from other producers' and their experiences with weaning, early selling, agistment and feeding.

Join the Department of Agriculture and Fisheries and your Regional 'Climate Mate', John McLaughlin from the Northern Australian Climate Program, as we delve into:

- **Land Management:** Use climate data to help manage your land and match your stocking rate with available pasture
- **Business:** Harness climate projections for informed decisions and act early to mitigate financial impacts
- **Livestock:** Make decisions to improve nutrition and enhance productivity and welfare
- **You & Your Team:** Amidst climate challenges prioritise self-care and family well-being
